

## URGENT PRODUCT RECALL OF ALL UNITS

Trinity Manufacturing

Quality Control

Celestial City 77777

KNEE-Mail: Jeremiah@33.3

Dear Valued Customer:

Our records indicate that you are in possession of one of our units (Human Body, Lot No. GEN1.26). In accordance with Code PHIL4.19 (see Operations Manual) this notice is sent to advise you of a voluntary recall for all these units (both Male and Female models). Regardless of your unit's make or year and in spite of any "improvements" that may have been made, these products are defective and prone to malfunction in ways that cannot always be foreseen. Our Research & Development Department has confirmed that unless these units are repaired, they will eventually self-destruct... *all* of them.

Please be informed that the origin of this defect occurred *after* assembly. Research has verified that a competing firm infected the very first two units with a vicious virus that caused all software functions in those original units to behave in ways they were not designed for. This virus was highly contagious and almost immediately spread to all succeeding units. This means that *all* units are contaminated. Be advised, dear client, that your unit also is infected.

Because this virus is so difficult to detect, many may conclude they are an exception and need not respond to this voluntary recall. This would be a grave mistake. Our Chief Designer himself is deeply concerned and invites you to return your unit as soon as possible so repairs can be made and your unit can function as it was designed. While Trinity Manufacturing is not to blame for the presence of this virus or its tragic consequences, we stand ready to take full responsibility for all repairs. We promise to absorb all costs involved in restoring your unit to its original condition. Remember our work has a lifetime guarantee.

Should you desire confirmation that your unit has the virus, turn to GOSPEL 1-4 in your Operations Manual. Here you will see the specs on our Prototype (ADAM-II) and discover what our units are designed to both be and do. By comparing your unit with the ADAM-II, you will easily discern the systemic malfunction in your own unit.

Unless you respond quickly, you may discover it is too late. In some units the virus has operated for so long and so deeply that not even our best technicians can repair them. These units are destroyed.

This recall is voluntary so please do not disregard this notice. Call one of our technicians immediately for guidance in dealing with your unit's particular issues. For further help, consult the index of your Operations Manual (see Section JOHN-1.12 for initial instructions).

We at Trinity Manufacturing deeply value your trust. In fact, no one who has trusted in us has ever been disappointed! The Boss's own son stands behind all our commitments to you as a valued customer. If you have any further questions concerning this recall, please call us directly, toll free, night or day, at 1-800-MATT-21.22.
